

WE ARE FOUNDERS AND INNOVATORS

What we do

We offer Bachelor's degrees, Master's degrees and executive programs that you can't find anywhere else. We train future professionals, innovators and startupperes on the most requested skills by the labour market, equipping them with the competences they need to lead future challenges, not the past ones.

How we do it

We leverage on our digital and innovation DNA to develop advanced, highly skilled programmes and engaging teaching methods to enhance students participation and results.

Why we do it

We believe that new technology offers endless opportunities to improve our lives and skills.

Since the beginning we have invested in new ventures as the first start up incubator in Europe, we gave birth to over 100 successful start ups.

We have accumulated so much experience in new business model that we are now a center of innovation that supports the most dynamic companies in their transformation and innovation plans.

Of the graduates who decide to start
working right after their graduation is hired
within 2 months

24/7

Dedicated tutors

30+

Guest lecturers/speakers and meetings
with start ups/entrepreneurs a year

H-FARM College

#Learning experience

A man wearing a black face mask and a red and blue plaid shirt is standing in a classroom, gesturing with his hands as he teaches. He is facing a group of students who are seated at desks. Some students are looking at their laptops. The classroom has large windows in the background, and the overall atmosphere is one of active learning.

We believe that learning is more than what happens in class: we believe in hands-on teaching, interactions between students and teacher and mentors, a learning experience enriched by technology.

#Innovation by our students

We encourage our students to explore new paths as real entrepreneurs

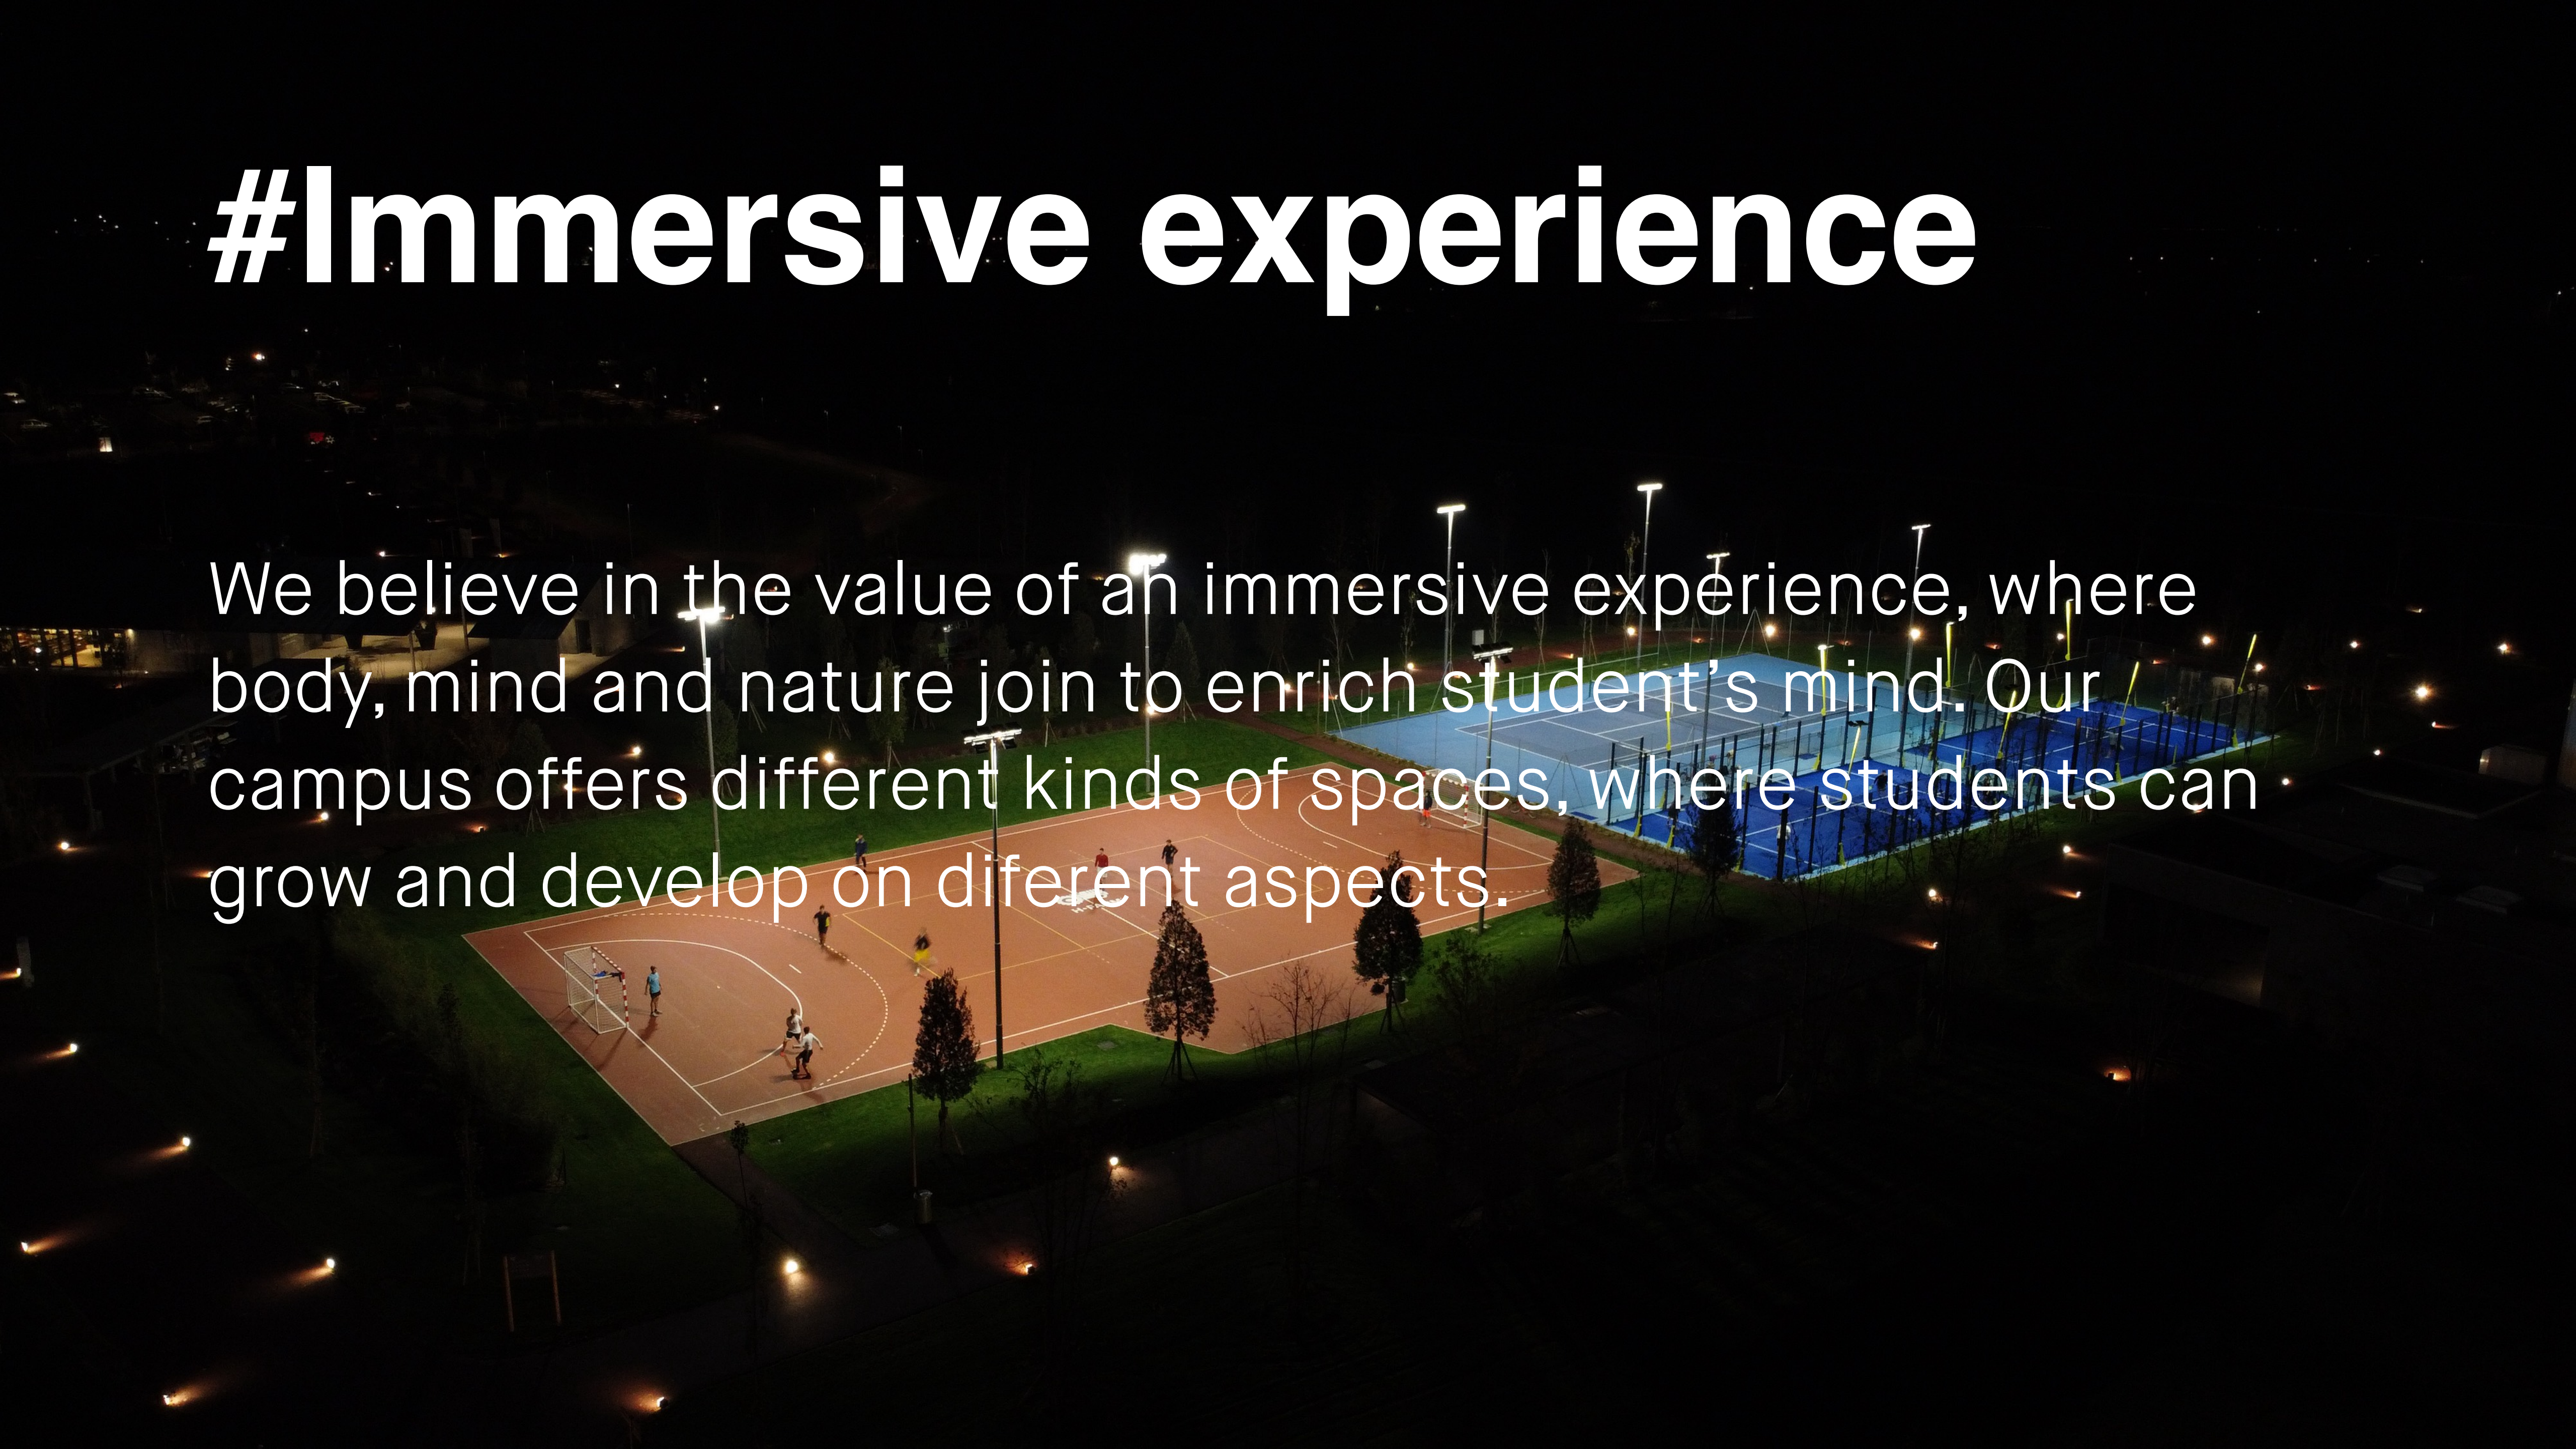

Isac is developing a subscription model for children's furniture to reduce the costs of updating the look and feel of the bedrooms.

Xuelan is creating a website to sell Made in China products online.

Alessandro and Enrico are working on their first startup project.

#Immersive experience

We believe in the value of an immersive experience, where body, mind and nature join to enrich student's mind. Our campus offers different kinds of spaces, where students can grow and develop on different aspects.

#Food for thoughts

Good food for beautiful minds, libraries, conference centers, sport facilities, green transportations, carbon free buildings. All in one place.

#Employability

Thanks to our knowledge, we craft programmes that give students the competences needed to embrace future challenges and thrive in the future job markets.

Future jobs

Data Science and Artificial Intelligence / Engineer and Cloud Computing / Internet of things / Machine learning / Cyber security / People and Culture / User Experience Design / Digital Marketing / Care Economy / Green Economy

Source: World Economic Forum

#Network

A real active network is key to bring the real business life into the Campus and to open the door to the next career step of our students.

and many more..
